### DETAILED ACTION

1. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 15, and 20 recite a printable coating composition comprising (1) an anionic acrylic polymer, (2) an epoxy acrylate in an amount sufficient to improve ink adhesion of said coating composition, and (3) a crosslinking agent wherein the crosslinking agent crosslinks the acrylic polymer to an extent sufficient to improve the resistance of said coating to isopropyl alcohol and/or hot water.

The closest prior art, Jensen (US Patent 5,662,985) fails to disclose or render obvious a printable coating composition comprising an anionic acrylic polymer that is crosslinked such that it is resistant to isopropyl alcohol and/or water and further comprises an epoxy acrylate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
